SINOAMERICA

Products Catalog

Sinoamérica Lub y Maquinaria SAS

Professional Industrial Equipment Supplier

Product Quality Assurance
Full-process quality inspection ensures stable performance, complying with international standards.

Comprehensive Product Range
Covers drilling machinery, engineering vehicles & core parts, offering one-stop procurement.

Global Delivery & Service
Reliable logistics network and professional team provide timely installation & after-sales support.

CONTENTS

01 Workover Rigs & Flush-by Units

02 Oilfield Anti-seepage Cloth

03 Used Workover Rigs

04 Used Top Drives, Mud Pumps, Generators

05 Custom-designed Mud Tank Groups

06 Heavy-duty Axles

07 Used Construction Equipment

08 Crimping Machines

09 Industrial Hoses & Fittings

10 Oil-drilling Accessories

11 Used Kelly Bars & Hydraulic Tongs

12 Oilfield Steel Wire Ropes

13 Industrial Lubricants

14 BOP Units & Accessories

02. Oilfield Anti-seepage Cloth

We provide anti-seepage cloth products specially designed for oilfields. Widely used in mud pits, waste disposal sites, and temporary stockpiles, they are essential impermeable barriers for oilfield environmental protection operations, ensuring ecological safety.

Made from high-strength, eco-friendly polymer materials, it combines excellent anti-seepage performance and weather resistance. Designed for harsh oilfield conditions, it effectively blocks liquid leakage and prevents soil and water pollution, ensuring green mining.

High Strength

Tear-resistant and durable for long-term use

Excellent Impermeability

Effectively prevents liquid seepage

Environmental Protection

Made from non-toxic materials, easy to recycle

Easy Installation

Lightweight and flexible for quick deployment

01. Workover Rigs & Flush-by Units

Live shot of XJ450 self-propelled double-drum workover rig, designed for complex geological environments such as deserts and gobi, demonstrating excellent adaptability for field operations.

We offer various models of workover rigs and flush-by units suitable for oil and gas well operations under different depths and geological conditions. The equipment is stable in performance and easy to operate, making it an ideal choice for oilfield operations.

Multiple Models Available

Covers all operational scenarios from shallow to deep wells, supports customized configurations to meet the working conditions of different oilfield blocks.

Excellent Environmental Adaptability

Adopts high-strength steel structure and dust/sand-proof design, maintaining stable operation in high temperature, severe cold and high dust environments.

02. Used Workover Rigs

The picture shows a second-hand 750HP oilfield drilling rig meeting API standards, in excellent condition for various complex oilfield operations.

We offer used workover rigs of various models, which can be equipped with brand-new diesel engines according to customer requirements. All used equipment has undergone strict inspection and comes with a detailed inspection report to ensure reliable performance.

High Cost-Effectiveness

Significantly reduces initial investment compared to new units, controls project budget effectively, shortens ROI cycle and improves capital utilization.

Flexible Customization

Supports replacement of new diesel engines and hydraulic systems, custom-configured for different depths and operating environments.

Quality Assurance

Strict full-process inspection with authoritative reports, ensuring core components are fault-free and ready for safe, reliable use upon delivery.

03. Used Top Drives, Mud Pumps, Generators

We supply key oilfield equipment such as used top drives, mud pumps, and generators. These devices are sourced from regular channels, fully inspected, and stable in performance, making them important supporting equipment for oilfield operations.

01/ Used Top Drive

Delivers powerful rotational power for deep well drilling. Precision-tuned for stable torque, it enhances drilling efficiency and safety, serving as the core power source for the rig system.

02/ Industrial Mud Pump

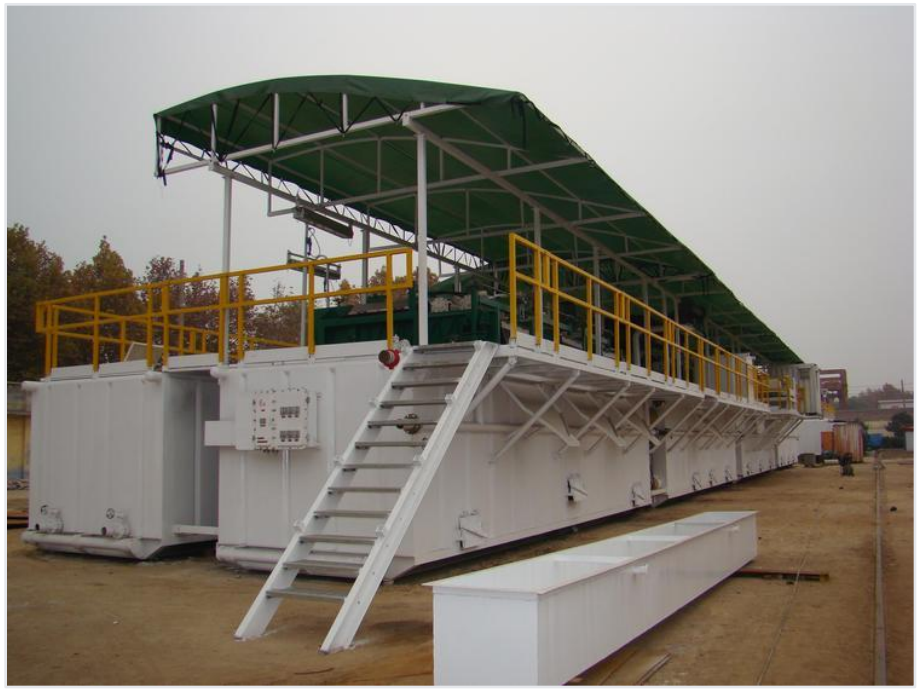

Horizontal triplex reciprocating pump with uniform flow and stable pressure. Ensures smooth drilling fluid circulation, safeguarding wellbore stability, bit cooling, and cuttings transport with long-lasting performance.

03/ Industrial Generator Set

High-power diesel generator set with open design for outdoor use. Provides continuous and stable power to ensure round-the-clock operation of on-site equipment, a reliable power backup for oilfield operations.

04. Custom-designed Mud Tank Groups

Real scene display of standardized skid-mounted mud tank groups. The integrated design effectively saves on-site installation time and improves drilling efficiency and safety.

We can design and manufacture various types of mud tank groups according to the specific requirements and site conditions of customers. The skid-mounted design facilitates transportation and installation, meeting the needs of drilling operations of different scales.

Customized Design

Flexibly customize dimensions, volume and pipeline layout based on space and process flow to match project needs precisely.

Quick Deployment

Integrated skid-mounted design eliminates on-site welding, enabling convenient transport, shorter installation and rapid commissioning.

Durable & Long-lasting

Made of high-strength corrosion-resistant steel with strict anti-corrosion treatment, it adapts to harsh field conditions and extends service life.

Professional Manufacturing • Strict Quality Inspection • One-stop After-sales Service

05. Heavy-duty Axles

We provide various axles suitable for heavy-duty trucks and special vehicles. The products are made of high-quality materials, with a sturdy structure and strong load-bearing capacity, ensuring safe and reliable operation under harsh road conditions.

我们专注于重型车桥的研发与制造，产品覆盖全系列重型卡车及特种车辆底盘需求。凭借坚固的结构设计与优异的承载能力，能够从容应对矿山、基建等复杂恶劣的运行环境，为车辆提供可靠的动力传输与安全保障。

Core Application Areas

Heavy-duty Truck Chassis

Adapted for various heavy-duty freight trucks, providing strong load-bearing and transmission support to meet long-distance heavy-haul transportation needs.

Special Engineering Vehicles

Customized for engineering machinery such as excavators and loaders, adapting to complex terrain at construction sites with strong resistance to bumps and torsion.

Mining Transport Equipment

Designed for harsh mining conditions, corrosion and wear resistant, ensuring the efficiency and safety of material transportation in mining areas.

06. Used Construction Equipment

We offer used construction equipment such as excavators, cranes, forklifts, and pipe handlers of various models. Brand-new diesel engines are optional, and inspection reports and Hague Apostille certificates are provided to ensure the quality and legality of the equipment.

Volvo EC290B Excavator

Equipped with a high-power engine for strong power, suitable for mining, infrastructure construction and other heavy-duty complex working conditions.

XCMG QY16 Truck Crane

A classic truck crane model with compact and flexible structure, stable and efficient lifting operations, an ideal cost-effective choice for small and medium-sized projects.

Comprehensive Equipment Coverage

Covers excavators, cranes, forklifts, pipe handlers, etc., to meet diverse project needs.

Optional Power System Upgrade

Optional brand-new diesel engines for better performance, longer lifespan, and lower operational costs.

Authoritative Certification

Provides professional inspection reports and Hague Apostille for legality and compliance.

07. Crimping Machines

SDX-95 Series Hydraulic Crimping Machines | Precision crimping, stable and reliable

We provide various models of crimping machines for crimping metal fittings onto rubber hose ends. The equipment is easy to operate with high crimping precision, suitable for the processing and manufacturing of various industrial hoses.

Multiple Model Options

Compatible with various pipe diameters and fitting types, flexibly meeting hose processing needs in different industrial scenarios with strong compatibility.

Hydraulic Pressure Drive

Powered by a high-power hydraulic system, it delivers strong and stable crimping force to ensure tight bonding and prevent leakage.

Convenient Mold Change Design

Modular mold structure enables quick disassembly and assembly, significantly reducing mold change time and improving production efficiency.

Efficient and precise crimping technology provides a solid guarantee for the safe operation of hydraulic systems and helps enterprises improve production efficiency.

08. Industrial Hoses & Fittings

We provide a full range of industrial rubber hoses and fittings suitable for hydraulic systems, pneumatic systems, and fluid transfer. The products are made of high-quality rubber and metal materials, resistant to high pressure, wear, and corrosion.

Core Product Series

High-pressure Hydraulic Hoses

Designed for heavy machinery hydraulic systems, featuring high-pressure and anti-pulse performance for stable power transmission.

Industrial Pneumatic Hoses

Lightweight with high elasticity and low gas loss, ideal for automation lines, pneumatic tools and control systems.

Precision Metal Fittings

Precision-forged with high thread accuracy and excellent sealing to prevent leakage, compatible with various calibers.

Multi-medium Compatibility

Oil, acid, alkali and aging resistant, suitable for hydraulic oil, coolant, lubricants and chemical fluids.

09. Oil-drilling Accessories

We supply various oil-drilling accessories, including wellhead connectors, elevators, and various power tongs. These accessories are key components in drilling operations, and we ensure that the product quality and performance meet industry standards.

Core Product Series

Wellhead Connector Components

Adapt to various wellhead devices, made of high-strength alloy, pressure and corrosion resistant, with excellent sealing performance.

Drilling Elevator Equipment

Forged from high-strength alloy steel, stable structure, accurate clamping of drill string, improving operation safety and efficiency.

Multifunctional Drilling Tongs

Strong torque, flexible and convenient operation, suitable for make-up and break-out operations of different specifications of drill pipes.

Customized Tool Solutions

Support non-standard customization, design exclusive tools according to special geological conditions to solve complex problems.

10. Used Kelly Bars & Hydraulic Tongs

We provide used kelly bars, hydraulic tongs, and other drilling tools. These equipments have undergone strict maintenance and are reliable in performance, making them an ideal choice for reducing drilling costs.

High-strength Kelly Bar

Made of high-quality alloy steel, crack-free via ultrasonic testing, with high thread precision. Suitable for ZJ series rigs, with sufficient stock for fast delivery.

Efficient Hydraulic Tong

Equipped with high-power hydraulic system, strong clamping force, 30% higher make-up/breakout efficiency. Compact structure, easy to operate, ideal for deep/ultra-deep well operations.

Professional Inspection & Support

Fully disassembled, cleaned, repaired and tested. Provide complete inspection reports, support on-site trial operation to ensure ready-to-use and worry-free after-sales.

Used Kelly Bar Storage Yard

Complete specifications, on-site inspection, direct delivery

Hydraulic Power Tong Section

Precision hydraulic control, intact mechanical performance

11. Oilfield Steel Wire Ropes

High-strength steel core structure · Professional industrial packaging

We provide various types of steel wire ropes for oilfield use, suitable for drilling, workover, and oilfield lifting operations. The products are made of high-strength steel wires with good flexibility and wear resistance.

Core Application Areas

Drilling Operations

Suitable for deep well drilling and complex formations, ensuring stable and reliable lifting of drilling tools.

Workover Operations

Suitable for downhole maintenance, with excellent impact resistance and fatigue resistance.

Oilfield Lifting

Used for handling heavy equipment and pipes, with high safety factor and strong load capacity.

Heavy Lifting

Meets the vertical lifting needs of various heavy loads, suitable for a variety of harsh working conditions.

12. Industrial Lubricants

Shell Helix HX5 PLUS | Synthetic Technology Formula
Effectively cleans the engine and improves power performance

We provide various types of industrial lubricants suitable for the lubrication and maintenance of various mechanical equipment. The products have stable quality and excellent performance, which can effectively extend the service life of the equipment.

High-performance Hydraulic Oil

Designed for high-pressure hydraulic systems, with strong anti-foaming properties and rapid lubrication response, effectively preventing component wear and ensuring efficient and stable system operation.

Heavy-duty Gear Oil

Boasts excellent extreme pressure and anti-wear performance, resists heavy load impact, and is suitable for harsh lubrication scenarios such as industrial gearboxes and transmission systems.

Advanced Engine Oil

Excellent cleaning and dispersing properties reduce carbon deposits and sludge, adapting to heavy-duty working conditions such as engineering machinery and generator sets, and extending the overhaul cycle.

Special Industrial Lubricants

Customized for special working conditions such as high temperature, low temperature and high speed, covering special oils such as vacuum pump oil, compressor oil and heat transfer oil.

13. BOP Units & Accessories

We provide new and used Blowout Preventer (BOP) equipment, as well as matching connectors, unions, connecting pipes and other accessories. All products comply with API standards to ensure the safety of oil and gas well operations.

Core Control Equipment

Covers annular, ram and other types, responds quickly to well surges, and is the first line of defense for downhole pressure control.

High-pressure Union

High-strength sealing design, adapts to extreme working conditions, ensures no leakage in high-pressure fluid transmission.

Precision Connector

Multi-spec thread adaptation, precision processing, high pressure and corrosion resistance for stable pipeline connection.

High-pressure Connecting Pipe

Customized seamless steel pipes with strong compression resistance, suitable for various fluid transmission scenarios.

API 16A Annular BOP

Adopting an advanced spherical rubber core structure, it has full and semi-sealing functions and can effectively seal drill tools and wellheads of various sizes. Compliant with API 16A standards, it is flexible in operation and excellent in sealing performance.

High-pressure Union Assembly

Forged from high-quality alloy steel and subjected to strict heat treatment processes, it has excellent impact and fatigue resistance. Precision thread processing ensures tight connection for high-pressure fluid systems.

THANK YOU

Looking forward to cooperating with you
